

HOW TO HANDLE PUPPY LOVE

Dual technology detectors were a great way to keep an eye on the house. But they're not very friendly to pets.

TriTech™ detectors from Detection Systems are designed to make your homeowners happy – whether they own a trio of tom cats or an 80-lb golden retriever.

DS TriTech™ sensors use an integrated mini-computer to analyze dual infrared and microwave signals.

These sensors provide precise monitoring, yet they're immune to pets. So cats and dogs can move freely in the home – without false alarms.

Your pet-loving customers will love it.
